1/1/

My dear Maharaja,

You are a puppet now in the hands of the British Government. You have no ruling power. The Dewan to whom you have given the post, is a mere mechanical Engineer, and can Construct Bridges. He knows nothing of Revenue works, and when there are so many qualified hands in your state. It is a very strange thing to see that a man of Visvesvaraiah's position is to be given as post in your state. You know nothing of the State affairs, and do not know whom you are to be affronted as the Dewan and to whom the Chief Engineer. the Dewan has sent for four Europeans from England and they are given the posting a Chief Engineer, an Asst, and some other works, and they are paid some thing like 2500, 3000, etc. Do for the Name you not got some Commonsence and see what the Dewan is doing. You want all graduates to the [illegible]

Maharaja, and I am sorry, you are going to lose your prolivices soon. You have numberless Motor Cars which are a nouse. When a Maharaja goes out, he has to take with him all the pharaphernalia and not to go in a motor Car, like a thief or a window. You are given Special trains, body guards and other Conveyances, and you all keep them and worship them. You are loosing much in mey on horses and others and you dont help the poor and suffering [illegible] Consider all this well and do the

Dewan office. What does a new graduate know about the Revenue work, and others. Hear think well before you do any thing. Dont get outsiders for the Mysore prolivices. There are many Iyers and Iyangars from outside who have given their Wives to the Europeans and who hold high appointments in the State the things are growing dearer and the poor class are much suffering. you dont look to their Comforts. but you pay 300 or 400 to a European lady, who often all gives nothing to you, but a Triangular organ, which your lady has. so I dont see any reason why should pay so much. your mother and Sisters have become street prostitutes when your mother was pregnant for some time you have ordered to your officers that no outsider should enter your palace. Palaces are built for the Visitors and other people and not for the [illegible]
